EDUCATION

University of California, Berkeley | College of Computing, Data Science, and Society
Bachelor of Arts in Statistics

Berkeley, CA

Northern California Scholarship Federation (2023), Gallo Cultivate Program Scholarship (2023), Berkeley Undergraduate Scholarship (2023)

Relevant Coursework: Multivariable Calculus, Linear Algebra, Intro to Programming, Intro to Data Science

WORK EXPERIENCE & RESEARCH

E. & J. Gallo Winery

Modesto, CA

Machine Learning & Data Analysis Intern Rotation 1

June 2023 - August 2023

- Connected AWS Redshift to Sagemaker to manage company data and discover trends to capitalize on.
- Used Sagemaker to train ML models and created a Proof of Concept (POC) for the ML lifecycle.
- Presented findings to 20+ senior statisticians, resulting in the adoption of ML lifecycle at Gallo.

Machine Learning & Data Analysis Intern Rotation 2

June 2024 - August 2024

- Expanded Proof of Concept (POC) using R and PySpark, processing billions of consumer records.
- Built 5 machine learning models to predict customer churn with up to 90% accuracy using Fetch Rewards data.
- Optimized ML models and brainstormed ideas to reduce customer churn by up to 20%.

Parks Youth Committee – Tuolumne River Trust

Modesto, CA

Lead Data Analyst and Youth Ally

July 2022 - August 2023

- Created a survey with 80+ responses and led to a 200% increase in awareness of the committee.
- Audited parks for data on accessibility, quality, environment etc. to compare affluent and low-income parks.
- Advocated for more funding to parks in the local government, leading to long term infrastructure redesigns.

Center for Targeted Machine Learning

Modesto, CA

Researcher

June 2024 - Current

- Does Metformin (solo), Levothyroxine, or Ondansetron (pooled) decrease the likelihood of contracting Long COVID?
- Analyzed 500,000+ N3C medical records to assess impact of specific drugs on Long COVID contraction.
- Collaborate weekly with 10+ team members, contributing to 2 sections of upcoming research papers.

LEADERSHIP EXPERIENCE & PROJECTS

Mental Health Classifier Project

Self-Done

N/A

June 2024

- Used mental health survey data to create visual relationships between reported levels of optimism and sexual drive.
- Engineered a Random Forest Classifier achieving 75% accuracy in identifying 3 distinct mental health disorders.
- Leveraged this model to input data so anyone could identify if they had a risk of a mental health problem.

AirBnb Data Science Project

UC Berkeley

Project Member

September 2023 - November 2023

- Led 4-person team in analyzing 100,000+ AirBnb listings in Seattle using Python.
- Determine which AirBnb to rent from a consumer point of view using a Random Forest Regressor (90% accuracy)
- Learned to use DeepNote along with standard data science procedures like Pandas, Sklearn, Matplotlib, etc.

Stanislaus County Leadership Academy

Modesto, CA

Student

2022 - 2023

- Participated in 8 monthly industry exploration sessions, developing key professional skills.
- Engaged with 15+ local companies and organizations across diverse sectors.
- Spoke with a diverse group of successful people and received guidance for specific career paths.

SKILLS AND INTERESTS

Computer: Amazon Web Services, JupyterHub, Python, HTML, R, Machine Learning

Languages: Gujarati (Conversational), English (Proficient)

Interests: Lifting, Reading, Investing, Artificial Intelligence, Traveling, Space Exploration, Philosophy, Visual Explanations of Math
